

# WIRELESS BACKUP CAMERA SYSTEMS

Our wireless camera systems boasts digital wireless range from 70 to 100 feet which is guaranteed to work at highway speeds. Installation takes less than an hour and the system comes with an instant pair feature which allows the driver to pair camera to monitor without leaving the cab.

With an IP69K rating, the highest IP rating available, the camera works in all weather conditions. 18 infra-red lights ensure a perfect view on the darkest night. Optional side cameras available.
